

WHAT IS CLAIMED IS:

1. An artificial reef for attracting fish comprising:

5 a main body having an outer surface and a plurality of spaced apart apertures formed therein; and

a plurality of elongate members, each of said members having a distal end and a proximal end, the proximal ends of said members inserted into
10 respective apertures of said main body, whereby the distal ends of said members are disposed in spaced relation from said main body.

2. The invention defined in Claim 1 wherein said
15 main body is formed of a plastic material.

3. The invention defined in Claim 2 wherein said plastic material is polyvinyl chloride.

20 4. The invention defined in Claim 1 wherein said main body is comprised of a central core member and a peripheral outer shell.

5. The invention defined in Claim 1 wherein said
25 elongate members are hollow.

6. The invention defined in Claim 1 wherein said elongate tubes are formed of plastic material (polyvinyl chloride).

7. The invention defined in Claim 6 wherein said plastic material is polyvinyl chloride.

5 8. The invention defined in Claim 1 wherein said elongate members are different lengths.

9. The invention defined in Claim 1 wherein said elongate members include a first group of members of a
10 predetermined length and at least a second group of members of a different length.

10. An artificial reef for attracting fish comprising:

15 a main body of spherical shape; and
 a plurality of elongate members extending radially outwardly from said body.

11. The invention defined in Claim 10 wherein said
20 elongate members include a proximal end and a distal end.

12. The invention defined in Claim 11 wherein said main body is provided with a plurality of apertures for
25 receiving the proximal ends of respective ones of said elongate members.

13. The invention defined in Claim 11 including an insert snugly disposed in each of the apertures in said main body, said insert receiving the proximal end of the
5 respective elongate members.

14. The invention defined in Claim 10 wherein said main body includes an inner spherical member and an outer spherical member.
10

15. The invention defined in Claim 14 wherein the outer member is provided with a plurality of apertures for supportingly receiving respective ones of said elongate members.
15

16. The invention defined in Claim 15 wherein said elongate members are hollow tubes.
